SUMMARY

Motivated IT undergraduate specializing in Information Technology at SLIIT, seeking a Quality Assurance / Software Testing Internship to apply manual testing, functional testing, test case preparation, bug reporting, and technical problem-solving skills. Hands-on experience in web application development, database management, REST API concepts, machine learning-based systems, and academic software projects. Familiar with Java, Python, JavaScript, HTML, CSS, MySQL, MongoDB, Git, GitHub, Postman, and basic testing practices. Eager to contribute to quality assurance activities such as test case preparation, functional testing, UI testing, API testing, bug identification, and documentation while learning industry-standard QA processes.

CORE SKILLS

Software Testing & QA: Manual Testing, Functional Testing, UI Testing, Regression Testing Basics

Programming Languages: Java, Python, JavaScript, HTML5, CSS3

Web & Backend Technologies: React, Node.js, Express.js, REST API Basics

Database Technologies: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA

AI & Data Skills: Machine Learning Basics, NLP Basics, Data Preprocessing, Scikit-learn, Pandas

Familiar: R Programming, Ubuntu/Linux Basics

EDUCATION

BSc (Hons) in Information Technology

Jan 2024 - Present

Sri Lanka Institute of Information Technology - SLIIT

Undergraduate Student | Present

G.C.E Advanced Level

2020 - 2022

J/Nealiddy Central College

PROJECTS

Fake Review Detection System | Machine Learning / NLP Project

Technologies: Python, Machine Learning, NLP, Scikit-learn, Pandas

- Developed a machine learning-based fake review detection system to classify online reviews as genuine or suspicious using text-based features.
- Applied NLP preprocessing techniques such as text cleaning, tokenization, stop-word removal, and feature extraction using Python and Scikit-learn.
- Tested model predictions using sample review data and evaluated output accuracy to understand data validation, result verification, and model behavior.

Web-Based Tour Guide System | Web Development Project

Technologies: HTML5, CSS3, JavaScript, MySQL

- Developed a responsive tourism management website that provides destination recommendations, travel planning support, and location-based information.
- Implemented user interface pages, form handling, navigation flows, and MySQL database structures to manage destination and user-related data.
- Performed basic QA activities including UI testing, form validation testing, navigation testing, responsiveness testing, and database data verification.

Jewelry Shop Management System | Full Stack Project

Jan 2023 – Jun 2023

Technologies: MongoDB, Express.js, React.js, Node.js

- Developed a MERN stack inventory and sales management system to manage products, stock records, customer details, and sales-related information.
- Implemented frontend components, RESTful API endpoints, and MongoDB operations for product creation, updating, deletion, and data retrieval.
- Tested CRUD workflows, API responses, frontend validations, and database updates to ensure accurate system functionality and smooth user experience.

Wedding Booking & Vendor Management System | Academic Project

Jan 2023 – Jun 2023

Technologies: Java, HTML, CSS, IntelliJ IDEA

- Supported the development of a wedding booking and vendor management system for managing customer bookings, vendor details, and event records.
- Implemented CRUD functionalities using Java and applied object-oriented programming concepts to organize system logic and improve maintainability.
- Tested booking workflows, input validation, record creation, update/delete functions, and file-based data handling to identify functional issues.

CERTIFICATIONS & ACHIEVEMENTS

AI Research Project – Multi-Modal Assistive System | ThinkAI Expo 2025

- AI Research Participant & Poster Presenter – ThinkAI Expo 2025, SLIIT Northern Uni
- Participated in student-led technology and innovation projects

ADDITIONAL SKILLS

Digital Marketing: Content strategy, social media campaigns, audience engagement

Content Creation: Video editing, camera operation, creative direction

Event Coordination: Coordinator experience at Syndix Manika event

Teamwork: Experience working in academic and event-based group environments

Communication: Able to explain ideas clearly and work with team members
